PROFESSIONAL SUMMARY

Versatile Senior Full Stack Engineer with 7+ years of hands-on expertise engineering high-throughput distributed architectures, secure SaaS frameworks, and responsive cloud systems using the MERN ecosystem, TypeScript, and AWS. Proven track record driving large-scale applications from architectural design to automated production deployments while collaborating with cross-functional development groups. Specialized in API engineering, performance profiling, and building real-time data streaming layers that cut processing latencies and optimize cloud operational spend.

CORE TECHNICAL CAPABILITIES

Languages & Environments: JavaScript (ES6+), TypeScript, Node.js, Python, HTML5, CSS3, C#

Backend Architecture: Express.js, NestJS, .NET Core, RESTful APIs, GraphQL, Microservices, Event-Driven Systems

Frontend & State Systems: React.js, Next.js (SSR/SSG), Angular, Redux Toolkit, Context API, Tailwind CSS, Material UI

Mobile Development: React Native, Flutter, Ionic Framework

Data Architecture: MongoDB (Aggregation Pipelines, Indexing), MySQL, PostgreSQL, SQL Server, Redis (Caching)

Cloud, DevOps & Infrastructure: Amazon Web Services (AWS EC2, S3, IAM, CloudWatch), Docker, CI/CD, GitHub Actions, Nginx

Protocols & Verification: WebSockets, Socket.io, WebRTC, JWT (JSON Web Tokens), OAuth 2.0, Role-Based Access Control (RBAC)

Tooling & Quality: Git, GitHub, Jira, Postman, Sentry, Jest (Unit Testing), Webpack, Vite

PROFESSIONAL EXPERIENCE

Full Stack Tech Lead – Sky Infoway

Mar 2025 – Currently Working | Surat, India

Inout Resident Management System (Enterprise B2B SaaS Ecosystem)

- Architected scalable decoupled backend services using Node.js, Express, and NestJS, minimizing database lock contention across shared resources.
- Designed an optimized microservices engine backed by complex MongoDB indexing strategies and MySQL relational configurations.
- Developed highly interactive administrative portals utilizing Next.js Server-Side Rendering (SSR) to ensure fast initial page load times.
- Engineered an instant visitor alert and notification matrix using WebSockets, reducing payload transit latencies across concurrent sessions.
- Containerized individual deployment services with Docker and orchestrated automated infrastructure builds onto AWS clusters.

Cowberry E-Commerce Marketplace & Fleet Logistics Matrix

- Led end-to-end development of a distributed multi-vendor marketplace utilizing the MERN framework, handling heavy API data ingestion loops.
- Configured payment routing layers by integrating Stripe and Razorpay processing suites to guarantee highly secure transactional isolation.
- Implemented memory caching policies utilizing Redis, accelerating standard API response turnarounds by 40%.
- Built web-based fleet mapping components via Socket.io to present responsive asset positions with secure Role-Based Access Control (RBAC).

Lead Full Stack Engineer (Senior Software Engineer) – Softices**Mar 2024 – Mar 2025 | Surat, India****Enterprise Workforce Management Platform & Cloud Integration**

- Engineered 50+ business modules including payroll, multi-tenant compliance logs, and automated attendance matrixes utilized by over 5,000 active platform users.
- Formulated strict End-to-End TypeScript schemas spanning GraphQL queries and RESTful APIs, preventing runtime object reference breakages.
- Introduced unified application telemetry, automated issue capturing, and real-time environment metrics by deploying Sentry hooks.
- Constructed automated CI/CD processing blocks using GitHub Actions to coordinate seamless Docker builds on AWS EC2 nodes behind Nginx reverse proxies.
- Refactored legacy stored procedures in SQL Server, producing a 30% speedup in heavy summary report calculations.

Senior Full Stack Developer – ProExelancers**Sep 2021 – Mar 2024 | Surat, India****Digital Points Rewards & WriteCraft Real-Time Collaboration Suites**

- Architected distributed event messaging pipelines using Node.js and MongoDB to manage peak operational traffic for over 10,000 users.
- Optimized transactional read-heavy query plans and relation indexes within MySQL, driving a 35% reduction in compute utilization.
- Designed an asynchronous image and documentation pipeline utilizing AWS S3 buckets to handle automated user compliance uploads.
- Created an operational-transform collaborative engine with Socket.io to manage concurrent state tracking updates.
- Developed responsive native mobile viewports across iOS and Android utilizing React Native and Flutter, linking JWT validation strategies.

Full Stack Engineer – Tecksky**Jan 2019 – Sep 2021 | Surat, India**

- **The Sports Zone Marketplace:** Crafted dynamic scheduling architectures and payment processing configurations using React.js and Node.js.
- **EduPlay Live Platform:** Integrated peer-to-peer real-time communication modules via WebRTC to handle scalable video streaming paths.
- **EventHub Connect & Loveln:** Conceived highly responsive spatial maps and chat structures with fine-tuned MongoDB collection schemas.

EDUCATION**Bachelor of Technology (B.Tech)****2018 – 2022**

Gujarat Technological University — Cumulative CGPA: 8.5/10.0
